

# Mounting instructions

## Solid & Grid Wall Shelves

weld & co

### PLEASE NOTE:

The wall shelves are intended for mounting on masonry walls using wall anchors and screws which are included in the delivery. When hanging the wall shelves on walls made of lightweight materials (drywall or similar), anchors which are suitable for the wall material must be used - these are NOT included. Some types of wallboard do not require the use of wall anchors.

### MOUNTING:

1. Lay the spirit level on the shelf.
2. Hold the shelf on the wall where you plan to hang it and position it so it is level.
3. Use a pencil to mark where you are going to drill - simply trace through the holes in the shelf onto the wall.
4. For masonry walls: At each point you've marked, use a 6-mm bit to drill two approx. 4-cm-deep holes into the wall.  
For drywall, etc.: If necessary, screw a wall anchor into each point you've marked.
5. For masonry walls: Insert wall anchors in the holes and carefully tap them into place using a hammer.
6. Insert a screw through each hole in the shelf and screw it into the wall anchor.

### OUR TIP:

Get a second person to help you hang the shelf.

### PLEASE NOTE:

The full load-bearing capacity of the shelf can only be met if it is securely and correctly attached to the wall.

### TECHNICAL SUPPORT:

post@weldco.de

### YOU'LL NEED:

Spirit level  
Pencil  
Drill  
6-mm drill bit  
(please select an appropriate drill bit for your wall material)  
Hammer  
Phillips screwdriver
